

OUR DESIGN FOR USER SATISFACTION: HIGH PRODUCTIVITY & LOW DEVELOPMENT COSTS

TekBank's development approach incorporates innovative, user-centric methods for analyzing, designing, developing and implementing programs. These solutions allow, and even encourage, continuous validation, vetting and content review by associated stakeholders. The requirements and features of each initiative that we undertake are carefully traced out; beginning with the product definition process through to the functions and features of final deliverables. This precision approach toward design and development allow TekBank clients a smooth and efficient experience.

APPLICATION DESIGN & DEVELOPMENT

AN EFFECTIVE & COLLABORATIVE DEVELOPMENT APPROACH

01

CURRENT STATE ASSESSMENT

- Existing Situation and Functional Capabilities Assessment
- Structures and Setup Evaluation
- Surrounding Business Process Research
- Technological Infrastructure Evaluation
- Current Issue and Key Constraints Review

02

APPLICATION ARCHITECTURE

- Development & Validation of Function Requirements and Specifications
- Identification & Design of Highest Value Architecture
- Development of Architecture Specifications Document

03

DETAILED DESIGN

- Custom Design Using Agile, Iterative Approach
- Application Configuration Designed to Enable Business

04

PRODUCT DEVELOPMENT & TESTING

- High-Quality, Approved Design Specifications
- Pre-Defined Unit Testing for Software Modules
- Integration Testing Ensuring Software Integrity & Performance
- Software Conformed to Business Look & Feel, Performance and Maintainability
